

Plaster - Texture - FireProofing - Manhole & Street Repair

The Desert Lynx is hydraulically operated, towable drywall/plaster/fireproofing machine featuring a single 60-gallon stainless steel mixing tank with one 2L4 rotor stator pump. The Desert Lynx is an economical machine, yet built much sturdier than other competitor comparable machines. The pump and mixer can be infinitely controlled over its operating range for superior control. This machine is designed for small jobs and is an excellent value.

Desert Lynx Specifications
