

# Iron Horse S-1

Fire Proofing - Pool Plaster - Finishing

The Iron Horse S-1 Mobile is a variation of the world class Iron Horse mobile plaster pump designed specifically for swimming pool plaster contractors. The S-1 comes complete with an Iron Horse plaster pump and a 1010 Powermix mixer set up as a left-hand dump. The equipment is mounted on a tandem torque-flex axle for the smoothest ride possible. The S-1 reverses pump and mixer placement from an Iron Horse Plaster Pump, with the mixer being mounted on the front of a tandem axle trailer with the Iron Horse plaster pump located at the rear. This configuration allows the mixer to work adjacent to a truck where material is stored for easy transfer. The S-1 is designed to mix & pump swimming pool finish plaster and pebble surface products. The equipment is also set up so that the Excalibur plaster pump and 1010 Powermix can be unbolted from the trailer and easily mounted on a truck if desired.

## Iron Horse Specifications

Full saving Hatz 2m 41 engine and 210 Quincy air compressor

Hydraulic Speed Control on Mixer (Infinite)

Hydraulic Powered Mixer, resulting in minimal maintenance and no mechanical failure

Iron Horse Plaster Pump
