

SINCE 1968

# CYCLONE SERIES SL-6

HOPPER & MIXER MOBILE MACHINE

## CYCLONE SL-6 SPECIFICATIONS

The Cyclone SL-6 was designed from the ground up as a completely hydraulic, high production screed self-leveling floor applicator. The Cyclone SL-6 utilizes an Automatic Self-Compensating "Smart System" to automatically adjust hydraulic oil flow to save fuel and reduce equipment wear & tear. It combines a hydraulically operated 14 cubic foot mixer with helical blades for a splash free and thorough mix with a hydraulically controlled hopper with Remixer for constant constancy in vermiculite, perlite, and cellular foam materials. The Cyclone SL-6 is an incredibly efficient combination for slurry applications. It can also pump acoustic, texture, EIFS, fireproofing, sand/cement slurries, and many other highly viscous and abrasive materials.

- Completely Hydraulic
- Automatic Self-Compensating "Smart System"
- 54 HP Hatz Diesel engine
- 2L6 Rotor-Stator Pump
- 93 Gal. Hopper with Remixer
- 14 Cubic Foot Hydraulic Mixer
- Convenient Operator Station
- Infinite speed control on both mixer and pump
- Large capacity fuel tank
- Torque-Flex Axle trailer
- 1-1/4" X 100' Material hose
- 1-1/4" X 30" Polegun w/ 4 Tips
