

Twister Grouter

Multi-Purpose Pump

The Twister Grouter multi-purpose pump is designed for the application of grout. It's variable speed feature allows for the precise control of pumping speed. With an air source, air line, and SF-409 polegun, it can spray acoustic, EIFS, drywall texture, fire proofing, sand/cement slurries, and many other specialty materials.

Industry professionals choose Spray Force for our innovation, experience, and four decades of proven quality. Compare our specifications and ask us how Spray Force equipment is different.
